

Certified archiving directly from SAP

Silent Cubes with SAP AL/CS

With the SAP AL/CS software option, Silent Cube Compact and Silent Cubes long-term long-term storage solutions are transferred into a certified, revision-safe archiving solution for SAP installations.

Silent Cubes with SAP AL/CS Option connect directly to the SAP system through the standard Archive Link interface, providing a fully integrated solution from a single vendor without the need for additional hard- and software.

The result is an easy to integrate archive solution with minimal administration effort.

The SAP Content Server implementation has been approved and certified by SAP.

Highest Security

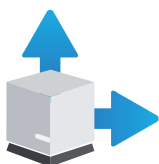

Data sealed by WORM hardware
12 hard disks, 4 each from 3 different vendors
Compensates for up to 4 hard disk failures
Regular self-check (Digital Audit)

Lowest Cost of Ownership

Low investment and operating costs (TCO)
Uses less than 2 watts per cube in standby mode
Minimum setup and administrative costs
Certified for revision-safe storage

Scalable & Modular

Scalable from 2 TB into the petabyte realm
Expansion & replication at any time, even retroactively
Conceived for 19-inch rack mounts
Includes software for replication to a second location

Full Service

On-site service by FAST LTA & certified partners
24/7 contact availability an optional plus
Includes hardware replacement with no loss of data
Flexible policy periods, fixed service costs

SAP AL/CS Option

- Software option for Silent Cubes* and Silent Cube Compact long-term storage systems
- Certified according to BC-HCS 6.20
- Art. Numbers:

SAP AL/CS Option	#7006
SC 4TB net	#7003
SC 8TB net	#7002
SC 16TB net	#7009
SC 24TB net	#7007
HU C4 server	#7101
HU C2 server	#7001
HU for VMware	#7010
Compliance Module	#7004
Service Level Agreement	#7300

* requires Compliance Module

Fully integrated

Directly from with the browser-based administration of the Silent Cubes long-term storage, Repositories can be created to hold your documents and components.

Also, the connection to an SAP Solution Manager is supported and can be administrated directly from within the user interface.

The integrated monitoring and statistics provide detailed information about the health of the Silent Cubes installation.

The screenshot displays the 'Manage repositories' interface. At the top, it shows the user 'admin' and the service activation date '12/12/2012'. The main area contains a table with the following data:

Alias	Description	Quota	Used	Free	Usage	Archived	Pending
rep_1	double_certificate	10,00 GB	1,58 MB	10,00 GB	0.01%	14	
rep_2		10,00 GB	1,58 MB	10,00 GB	0.01%	14	
rep_3	asdaddasd	10,00 GB	3,53 KB	10,00 GB	0%	4	

Below the table, a progress bar indicates 'Cube capacity in use: 12,62 TB of 16,00 TB' at 78.86%. A 'Notifications' table is visible at the bottom of the interface.

We secure Terabytes.

FAST LTA specialises in long-term data storage. Our certified storage solutions have been expressly and categorically developed for the secure, cost-effective, long-term safeguarding of digital data.

Our core technology is a pat.pend. WORM hard disk controller which uses a special coding algorithm and audits all data on a regular basis.

FAST LTA has been certified according to ISO9001 and meets highest quality standards.
